- Notification Interception: When a new notification arrives, the app captures it and applies pre-set rules or user preferences.
- Decision Process:

- If a notification is marked as high priority, it is delivered immediately.
- If it falls under a scheduled silence period, it is stored in the Notification Jar.
- For less critical alerts, it can be batched or suppressed.

- Delivery or Storage: Based on rules, notifications are either delivered instantly, delayed, or

stored for later review.

- User Review and Action: The user can review stored notifications within the app, choose to dismiss, mark as read, or reschedule delivery.

This process ensures users maintain control over their notification experience, minimizing disruptions while ensuring important alerts are never missed.
